

Hooks tab main body

The main body contains a list of hooks as shown in below snapshot:

The screenshot displays a list of hooks under the category "Test Hook 'Post Test Case Hook'". The first hook is "1. Slack Notification for Test Case Failure". Its details are shown in a table below:

URL	{{slackWebHookURL}}		
Description	For more information on configuring incoming slack webhook, view this documentation link https://api.slack.com/incoming-webhooks		
Method	POST	Condition	{{\${tc.result.isExecuted}}} && !{{\${tc.result.isPassed}}}
External Id	Empty	Authorization	Empty

The second hook is "2. Log JIRA Issue". Below it, the category changes to "Test Hook 'Post Test Run Hook'", with hooks "3. Slack Notification for Test Run Failure" and "4. Log JIRA Issue".

In the above snapshot, following sections are there:

1. Hook Category header
Hook category header defines the hook category for the hooks which are below the hook category header until the next hook category header appears.
2. Hook header
Hook header section shows the hook summary, request method, request URL and a selection checkbox to select the hook. When you click on the hook header, hook body will appear.
3. Hook body
Hook body section shows further details of the hook. It contains the following tabs:
 - a. Details Tab
 - b. Request Tab
 - c. Variable Extractor Tab
4. Pagination
Pagination section provide options to navigate to other pages of the hook list. This section appears only when number of records is larger than the selected page size.
