

API Mocks

The layout of this tab contains 3 sections as shown in the below screenshot:

1. API mocks - LHS pane
2. API mocks - tool bar
3. API mocks - main body

The screenshot displays the API Mocks interface, which is divided into three main sections:

- Navigation (LHS Pane):** Located on the left, it includes a 'Navigation' menu with 'API Mocks' and 'Mock Logger' options. Below this, it states 'API Mocks LHS Pane' and 'NO FILTERS APPLIED', with a 'Click here to filter' link. The 'MOCK REQUEST BASE URL' section shows a text input field containing 'https://vrest.' and a 'Generate Token' button. At the bottom, there is a 'MOCK AUTHENTICATION' section with a 'Help' icon and a 'Generate Token' button.
- API Mocks - Tool bar:** Located at the top, it features a search bar, a 'New' button, and a 'None selected' dropdown menu. The text 'API Mocks - Tool bar' is highlighted in red.
- API Mocks - Main Body:** The central area displays a list of API mocks. The first mock is selected and expanded, showing details for '1. API Mock 1' (GET /api-mock1). The details include a 'Description' field with the text 'Sample description will be here ...', a 'Method' of 'GET', and 'Versions' and 'Tags' listed as 'Empty'. A 'Wait for seconds' field is also present. Below the details, a list of five other API mocks is shown, each with a unique method (POST, PUT, PATCH, DELETE) and endpoint. The text 'API Mocks - Main Body' is highlighted in red.

At the bottom of the main body, it indicates 'Showing 1 to 5 of total 6 records' and includes a pagination control with buttons for '1' and '2'.
