

Enabling JIRA Projects in RMsis

It is possible to select / de-select the JIRA Projects which integrate with RMsis, from user's perspective. When a project is enabled, then

- It will become visible in the RMsis Project List displayed to user.
- RMsis links will become visible to the users on the issue screen.

The projects can be enabled / disabled by clicking on the check box in the **Active** column.

The screenshot shows the JIRA RMsis Administration interface. The top navigation bar includes 'JIRA', 'Dashboards', 'RMsis', 'Projects', 'Issues', 'Agile', 'SuiTest', and a 'Create' button. A search bar is on the right. Below the navigation bar, the breadcrumb trail is 'RMsis Home | RMsis Administration'. The user is identified as 'Optimizory | admin' with a 'Feedback' link. The main menu includes 'Users', 'Roles', 'Projects', and 'Configuration'. The 'Projects' section is active, showing a table of projects. The table has columns for 'Project Name', 'Description', 'Manager', 'Actions', and 'Active'. There are 18 rows of 'Demo Project' entries, each with a checkbox in the 'Active' column and a 'Manage Requirements' link in the 'Actions' column. The 'Active' column checkboxes are all checked. At the bottom, there is a pagination bar showing 'Now Showing 1 to 10 of 78 rows' and navigation buttons for 'First', 'Previous', '1', '2', '3', '4', '5', 'Next', and 'Last'.

<input type="checkbox"/>	Project Name	Description	Manager	Actions	Active
