

Third party tools - JIRA / Slack/TestRail ...

If a third party tool can be accessed using REST API then it can be easily integrated with vREST using hooks functionality. In this section, we are providing sample hook configurations for various third party tools.

1. [JIRA Integration](#)
2. [Slack Integration](#)
3. [TestRail Integration](#)

Note:

If you want vREST integration with a third party tool in your eco-system which is not mentioned above, then contact us at support@vrest.io with proper use case. We will try to embed the sample configurations here.
