

Attaching documents and links to Requirements

Clicking on the cell corresponding to a requirement under the links column , opens up the following dialogue box

The user can click on a document or link to open the same in a different tab or window, as the case may be.

Otherwise, clicking on the **Attach Document or Link**, opens up the following dialogue box

The user can

- enter the URL and press Save to attach specified link to the requirement.
- click on "Browse", to open the following dialogue box in order to select a file (please note that this is dependent on your operating system) and click on upload after selecting the file to upload the document.
