

# Accessing Requirements and Test Cases from Issues Page

## Linking with Requirements and Test Cases

On the Issues Page, a linking mechanism is provided to link Requirements and Test Cases, as shown in the following sub-sections

The screenshot shows the JIRA issue page for 'AF2-2' (TEST / TEST-25). The page includes a navigation bar with 'Dashboards', 'RMSis', 'Projects', 'Issues', and 'Create issue'. The issue details are as follows:

Field	Value
Type	@ Task
Priority	Minor
Affects Version/s	None
Labels	None
Status	Open (View Workflow)
Resolution	Unresolved
Fix Version/s	None

The 'RMSis Links' section is highlighted with a red box and contains the following information:

Link Type	Value
Requirement/s	TEST-R22 (1)
Testcase/s	TEST-T21 (1)

After clicking on the indicated icons, a panel will open up, where the user can link Requirements OR Test Cases with the issue. A sample screen is shown below.

## Option 2 : By using "More Actions" menu item

This is the old mechanism of showing Requirements which was available from RMsis Version 1.2.1 onwards.

RMsis provides the facility to view linked requirements from the JIRA Issues Page. In order to view the linked requirements

1. Click **More Actions** menu item
2. Select **Linked Requirements** web item
