

Accessibility Support in RMsis

RMsis provides enhanced Accessibility Options. A brief description of the same is presented below:

Enhanced Keyboard Handling

- TAB and ESC keys work as implemented in RMsis and as per the default browser behavior.
- Arrow keys can be used to navigate inside the Datatable.
 - Within the Datatable, arrow keys can be used for navigation and the currently selected cell will be highlighted.
 - Enter key can be used in highlighted cell to simulate a click event.
- Known limitations
 - The users may face issues regarding navigation and usage of [RMI-1916]
 - Drop Down Lists
 - Date panels
 - Attachment panels

Audio Support

- Audio support should work well within the main RMsis Application.
- Known limitations
 - The users may face issues, while using the Datatables [RMI-1917]
