

Test Run Summary Report

A Test Run Summary Report can now be viewed by the users, under the Test Case Tab, as shown below:

Test Runs Summary Table

Name	Description	Build/Version Details	Environment	Start Date	End Date	Summary Report	Release Id
Alpha TR 3	Alpha TR 3			22 Apr 2015	8 May 2015	2 blocked, 3 passed with exception, 0% requirements passed	Version 3
Alpha TR 2	Alpha TR 2			8 Apr 2015	30 Apr 2015	1 failed, 4 passed, 100% requirements passed	Version 2
Alpha TR 1	Alpha TR 1			6 Apr 2015	9 Apr 2015	2 blocked, 1 failed, 7 passed, 66.7% requirements passed	Version 1

Now Showing 1 to 3 of 3 rows

The Requirement pass rate displayed in "Summary Report" is calculated as follows:

- **Requirement pass rate = (Number of passed requirements associated with given test run / Total number of requirements associated with given test run) * 100**
- A requirement is considered associated with test run if its linked test cases are contained in given test run
- A requirement is considered pass if all the associated test cases contained in given test run have "Pass" status.
